I am a software engineering student at Thammasat University. Have a passion for web and mobile development As well as expertise in UX/UI design Who are a fast learner and open mind, I am seeking a job opportunity to develop innovations to great performance.

Work Experiences

WEDO - SCG Cement-Building Materials

Jun 2022 - Currently

Digital Technology Trainee - part time

- Research and Development about Electric Vehicle Infrastructure in Condominiums and Certified Safety Standards for "meplug".
- Pitched on Teachsauce Global Summit 2022 Tech Showcase Stage , SX EXPO 2022 , Thailand HR Tech 2022 and SCG : The Next Chapter.

Young Talent Program 2022 - internship

- Developed a service for condominiums that allows anyone to access electricity in parking lot using "meplug" , Implemented feature connect IoT device to cloud and Desig Web Admin Dashboard and Mobile Application Interfaces.
- Design tools used customer journey mapping, service design, and user flow , Figma to design web and mobile interfaces.
- Technologies used Google Cloud Firestore , ESP32

Thammasat University

Aug 2021 - Dec 2022

Full Stack Developer in Mypark Project

- Developed an admin dashboard for Partking System in Thammasat University , Implemented feature dash board , Authentication and Backend API for Mobile Application and Web Application used Express.js , JWT and Multiple Database.
- Design tools used customer journey, user flow, and design thinking to design web and mobile interfaces.
- Technologies used React, React Native Expo, JWT, Firebase, MongoDB, and Express.js.

Frontend Developer in Welendar Project

- Developed an Calendar Application Cross Plaftform support both IOS and Android, Implemented feature Pre - Scéen and Local Storage.
- Design tools used Customer Journey , Design Thinking , Figma to design web and mobile interfaces.
- Technologies used React Native , Local Storage

Volunteers Experiences

Google Developer Student Clubs - Thammasat University

Nov 2021 - Currently

GDSC Lead - Volunteer

- I was selected to lead GDSC by Google as part of my responsibilities in GDSC-TU 2022-2023, I managed the GDSC Community and set up the GDSC structure to planned activities of the year with a core team.
- I organized a hands-on workshop called "**First Meet GDSC 2022**" that had over 50 participants.

UX/UI Core Team - Volunteer

- I planned events for the 2021-2022 period, And i organized a hands-on workshop called "Basic Figma for UX/UI" which was online via Facebook.

Skills

Languages : English - Intermediate , Thai - Native

Project Management : Efficiently prioritize and manage tasks in software projects and enable teammates to learn as they work.

Questioning : Sensitively elicited information from users to determine barriers and blockages to achieving their goals.

Technical Capabilities

Programming Languages : Python , Java , Go , Javascript/Typescript , HTML , CSS , PHP , C/C++

Software Engineer : MVC , REST API , UML Diagram , Software Architect Design , OOP

Frameworks/Libraries : React/React Native , Redux , Next.js , Laravel , Express.js , Native Base , Bootstrap

Databases : Mysql , MongoDB,Cloud Firestore Database

Others : Ubuntu , Docker

Education

Thammasat University Campus Rangsit

Aug 2020 - Currently

Bachelor Degree of Engineer in Software Engineering
